Machine Learning with R - Second Edition By Brett Lantz

Key Features

- Harness the power of R for statistical computing and data science
- Explore, forecast, and classify data with R
- Use R to apply common machine learning algorithms to real-world scenarios

Book Description

Machine learning, at its core, is concerned with transforming data into actionable knowledge. This makes machine learning well suited to the present-day era of big data. Given the growing prominence of R—a cross-platform, zero-cost statistical programming environment—there has never been a better time to start applying machine learning to your data. Whether you are new to data analytics or a veteran, machine learning with R offers a powerful set of methods to quickly and easily gain insights from your data.

Want to turn your data into actionable knowledge, predict outcomes that make real impact, and have constantly developing insights? R gives you access to the cutting-edge power you need to master exceptional machine learning techniques.

Updated and upgraded to the latest libraries and most modern thinking, the second edition of Machine Learning with R provides you with a rigorous introduction to this essential skill of professional data science. Without shying away from technical theory, it is written to provide focused and practical knowledge to get you building algorithms and crunching your data, with minimal previous experience.

With this book you™ discover all the analytical tools you need to gain insights from complex data and learn how to choose the correct algorithm for your specific needs. Through full engagement with the sort of real-world problems data-wranglers face, you™ learn to apply machine learning methods to deal with common tasks, including classification, prediction, forecasting, market analysis, and clustering. Transform the way you think about data; discover machine learning with R.

What you will learn

- Harness the power of R to build common machine learning algorithms with real-world data science applications
- Get to grips with R techniques to clean and prepare your data for analysis, and visualize your results
- Discover the different types of machine learning models and learn which is best to meet your data needs and solve your analysis problems
- Classify your data with Bayesian and nearest neighbour methods
- Predict values by using R to build decision trees, rules, and support vector machines
- Forecast numeric values with linear regression, and model your data with neural networks
- Evaluate and improve the performance of machine learning models
- Learn specialized machine learning techniques for text mining, social network data, big data, and more

About the Author

Brett Lantz has used innovative data methods to understand human behavior for more than 10 years. A sociologist by training, he was first enchanted by machine learning while studying a large database of teenagers' social networking website profiles. Since then, he has worked on the interdisciplinary studies of cellular telephone calls, medical billing data, and philanthropic activity, among others.

Table of Contents

1. Introducing Machine Learning
2. Managing and Understanding Data
3. Lazy Learning – Classification Using Nearest Neighbors
4. Probabilistic Learning – Classification Using Naive Bayes
5. Divide and Conquer – Classification Using Decision Trees and Rules
6. Forecasting Numeric Data – Regression Methods
7. Black Box Methods – Neural Networks and Support Vector Machines
8. Finding Patterns – Market Basket Analysis Using Association Rules
9. Finding Groups of Data – Clustering with K-means
10. Evaluating Model Performance
11. Improving Model Performance
12. Specialized Machine Learning Topics

Machine Learning with R - Second Edition By Brett Lantz Bibliography

- Sales Rank: #59988 in Books
- Published on: 2015-08-03
- Released on: 2015-07-31
- Original language: English
- Number of items: 1
- Dimensions: 9.25" h x 1.02" w x 7.50" l, 1.70 pounds
- Binding: Paperback
- 454 pages

Editorial Review

About the Author

Brett Lantz

Brett Lantz has spent more than 10 years using innovative data methods to understand human behavior. A trained sociologist, he was first enchanted by machine learning while studying a large database of teenagers' social networking website profiles. Since then, Brett has worked on interdisciplinary studies of cellular telephone calls, medical billing data, and philanthropic activity, among others. When not spending time with family, following college sports, or being entertained by his dachshunds, he maintains <http://dataspelunking.com/>, a website dedicated to sharing knowledge about the search for insight in data.

Users Review

From reader reviews:

Mary Moore:

Information is provisions for people to get better life, information these days can get by anyone at everywhere. The information can be a expertise or any news even an issue. What people must be consider while those information which is inside former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one the resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Machine Learning with R - Second Edition as your daily resource information.

Christopher Larsen:

The book Machine Learning with R - Second Edition has a lot associated with on it. So when you check out this book you can get a lot of profit. The book was written by the very famous author. Tom makes some research ahead of write this book. That book very easy to read you will get the point easily after reading this book.

Gail Beattie:

People live in this new day time of lifestyle always attempt to and must have the spare time or they will get lots of stress from both way of life and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not really a robot. Then we request again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will unlimited right. Then ever try this one, reading guides. It can be your alternative within spending your spare time, typically the book you have read is usually Machine Learning with R - Second Edition.

Victor Havens:

Many people said that they feel bored when they reading a reserve. They are directly felt that when they get a half parts of the book. You can choose the particular book Machine Learning with R - Second Edition to make your own reading is interesting. Your skill of reading ability is developing when you just like reading. Try to choose basic book to make you enjoy you just read it and mingle the idea about book and reading especially. It is to be 1st opinion for you to like to open a book and study it. Beside that the book Machine Learning with R - Second Edition can to be your new friend when you're sense alone and confuse in doing what must you're doing of their time.
