The Fertile Earth: Nature's Energies in Agriculture, Soil Fertilisation and Forestry (Ecotechnology) By Viktor Schaubberger

How does Nature work? When one looks closely at the enormously complex web of life, it is impossible not to be caught by the wonder of how all living things - including rocks and crystals - are interconnected. Just as there is thought behind action, so there is energy behind matter. Schaubberger is able to demonstrate how Nature works because he has been able to observe and describe how its energies manifest and produce the material world.

Editorial Review

About the Author

Viktor Schauberger (1885-1958) came from a long line of forest custodians. An Austrian naturalist, philosopher and inventor, his extraordinary understanding of the workings of nature derived from his keen powers of observation in the forest where he worked. Callum Coats is the author of *Living Energies*, the standard work of reference on Viktor Schauberger's ideas and studied with Schauberger's son, Walter, in Austria.
