The Urban Astronomer's Guide: A Walking Tour of the Cosmos for City Sky Watchers (The Patrick Moore Practical Astronomy Series) By Rod Mollise

This book covers the "why," "how," and "what" of astronomy under light-polluted skies. The prospective city-based observer is told why to observe from home (there are hundreds of spectacular objects to be seen from the average urban site), how to observe the city sky (telescopes, accessories, and moderns techniques), and what to observe. About half of the book is devoted to describing "tours" of the sky, with physical and observational descriptions, at-the-eyepiece drawings, and photographs.

Editorial Review

Review

From the reviews:

"The Urban Astronomer's Guide seeks to debunk and a convincing job it does too. ... a useful introduction to astronomy in general and a helpful guide to anyone, urban or otherwise, thinking of buying or upgrading their equipment. ... The Urban Astronomers Guide brings serious deep space observation right to where you can get the most out of it – your own back yard." (Ray Bradfield, *Astronomy and Space*, February, 2008)

From the Back Cover

Many amateur astronomers live in urban and highly developed suburban areas, and many of them believe that they can't observe deep-sky objects from such light-polluted locations.

But it isn't true.

Given the right techniques, urban astronomers can routinely observe deep-sky objects night after night – something most of us would never do if it involved driving miles into the country to find a dark site. Rod Mollise has observed the entire Messier list from his urban backyard, without high-tech equipment, using only commercially-made telescopes and simple accessories.

This is a guide to good deep-sky astronomy under bad skies.

There are literally hundreds of spectacular objects to be seen from the average urban site. After dealing with equipment, locations and even urban safety, Rod invites you to join him on his virtual "walking tours" of the night sky, with physical and observational descriptions, at-the-eyepiece drawings, and photographs.

Users Review

From reader reviews:

Janet Medley:

The reserve with title The Urban Astronomer's Guide: A Walking Tour of the Cosmos for City Sky Watchers (The Patrick Moore Practical Astronomy Series) has a lot of information that you can study it. You can get a lot of gain after read this book. This kind of book exist new expertise the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you throughout new era of the the positive effect. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Alex Jose:

People live in this new day of lifestyle always attempt to and must have the spare time or they will get great deal of stress from both everyday life and work. So , if we ask do people have free time, we will say absolutely yes. People is human not only a robot. Then we request again, what kind of activity are there when the spare time coming to a person of course your answer can unlimited right. Then do you try this one, reading textbooks. It can be your alternative in spending your spare time, often the book you have read is definitely *The Urban Astronomer's Guide: A Walking Tour of the Cosmos for City Sky Watchers* (The Patrick Moore Practical Astronomy Series).

Carman Robertson:

Your reading 6th sense will not betray an individual, why because this *The Urban Astronomer's Guide: A Walking Tour of the Cosmos for City Sky Watchers* (The Patrick Moore Practical Astronomy Series) reserve written by well-known writer who really knows well how to make book that could be understand by anyone who read the book. Written inside good manner for you, dripping every ideas and producing skill only for eliminate your own hunger then you still hesitation *The Urban Astronomer's Guide: A Walking Tour of the Cosmos for City Sky Watchers* (The Patrick Moore Practical Astronomy Series) as good book not only by the cover but also by the content. This is one guide that can break don't evaluate book by its cover, so do you still needing a different sixth sense to pick that!? Oh come on your reading sixth sense already said so why you have to listening to a different sixth sense.

Mary Stockton:

The book untitled *The Urban Astronomer's Guide: A Walking Tour of the Cosmos for City Sky Watchers* (The Patrick Moore Practical Astronomy Series) contain a lot of information on this. The writer explains the woman idea with easy method. The language is very easy to understand all the people, so do definitely not worry, you can easy to read it. The book was compiled by famous author. The author provides you in the new time of literary works. You can read this book because you can read on your smart phone, or program, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site as well as order it. Have a nice examine.
