**ArchiCAD 19 - The Definitive Guide** By Scott H. MacKenzie, Adam Rendek

**Dive into the wonderful world of Building Information Modeling (BIM) to become a productive ArchiCAD user**

## About This Book

- Create a house and a commercial office building in a virtual 3D environment
- Strategically placed best practice tips to help you create better and exciting models
- Step-by-step tutorial, covering the advanced tools and features of ArchiCAD while creating two complete construction projects

## Who This Book Is For

This book is for architects, architectural technicians, and construction professionals who are familiar with 2D CAD programs such as AutoCAD Lite, or have some exposure to a 3D BIM package such as Revit. No experience with ArchiCAD is required. If you want to learn the skills needed for architectural drawing production in the real world, then this book is for you.

## What You Will Learn

- Acquaint yourself with various project settings
- Explore a wide range of selection methods and modification features
- Create the walls, floor slabs, ceilings, and roofs of the residential and the commercial building
- Use the drafting and annotation tools
- Make objects and modify them to suit your needs
- Master view creation and graphic control
- Link and export files and discover the fundamentals of rendering

## In Detail

ArchiCAD 19 – The Definitive Guide ensures that you are equipped with the knowledge and skills required to take up any construction project, empowering

you to successfully create your own projects.

You will create two complete projects right from scratch, including a residential and a healthcare building. The first is a small residential house that utilizes all the basic modeling and drafting tools in ArchiCAD. It will give you a firm grip on the fundamentals of ArchiCAD before we move on to take up the more advanced and complex project that follows. The second project is a multi-storey healthcare building, where you will explore the leading-edge tools of ArchiCAD, thereby gaining the skills needed to use them in your own projects. The book will also take you through the design of the buildings, the output of all drawings, and associated construction documents. Best practice tips are inserted at key points along the way.

### Editorial Review

#### About the Author

##### **Scott H. MacKenzie**

Scott H. MacKenzie started working in the AEC (architecture, engineering, and construction) industry way back in 1988. His first role was as a manual draftsman, where he drew with ink on Mylar. Soon afterwards, he became a CAD operator. He loves creating, drawing, and managing construction documents. He worked with several different CAD programs and became a CAD manager in 1994. In 2003, he started using his first BIM program. Scott was convinced at that time that BIM was a much better way to draw, document, and manage drawing sets. Fast forward to today, and he says to you, "There is no project too small for the use of BIM (ArchiCAD). Those other CAD programs are stuck in 20th century technology." He spent the first 12 years of his career producing electrical, HVAC, and plumbing drawings. Then, in 2000, he jumped over to the architecture side and has been there ever since. Back in 2007, he was asked by Graphisoft to update ArchiCAD for AutoCAD Users to match the current version of ArchiCAD.

##### **Adam Rendek**

Adam Rendek moved to San Francisco to pursue his career in design and construction after graduating from the Budapest University of Technology and Economics with a master's degree in architecture and building engineering. He has worked on numerous large projects, both in Europe and the United States, including the Palace of Arts in Budapest recipient of the 2006 FIABCI Prix d'Excellence and the UCSF Mission Bay Hospital project in San Francisco. In addition to his professional work, he taught a lecture series on digital presentation and building information modeling at U.C. Berkeley in 2005 and 2006. Adam also worked on a research project that explores optimization opportunities in the energy modeling workflow and developed solutions to build life cycle and operations management in the past 3 years. He published several papers on building information modeling (BIM) and energy modeling and presented at a major conference in the United States and Europe. He is currently working on the BIM implementation of a large public organization (San Francisco International Airport) on behalf of DPR Consulting. His responsibilities include client stakeholder engagement as well as the development of technology implementation strategies. Adam collaborated with the Lawrence Berkeley National Laboratories in a research project, identifying optimal data exchange for energy modeling purposes. He was a consultant for IDEO, Adobe Systems, Autodesk, and Graphisoft on product development for the AEC industry.
