## **Agroecology** By Konrad Martin, Joachim Sauerborn

This book represents an interdisciplinary approach to the relevant aspects of agricultural production related to the interactions between natural processes, human activities and the environment. It provides condensed and comprehensive knowledge on the functions of various agroecosystems at the field, landscape and global scale. Understanding and integrating complex ecological processes into field production, land management and food systems is essential in order to deal with the challenges of modern crop and livestock production: the need for food security for the growing human population, and the necessity to combat the detrimental effects of food production on the environment. The book provides the scientific basis required by students and scientists involved in the development of sustainable agroecosystems and contributes to a range of disciplines including Agriculture, Biology, Geography, Landscape Ecology, Organic Farming, Biological Control, and Global Change Ecology.

## Editorial Review

### Review

From the reviews:

“Martin and Sauerborn ... use a broad approach to reach a wide spectrum of readers. The book has been translated very well from the original German. The examples and concepts of agroecology presented are universal. ... This has the potential to be the book that introduces new student cohorts in both biology and agriculture to the other's point of view and to begin a new, productive conversation to the benefit of both. Summing Up: Highly recommended. Upper-division undergraduates and above.” (M. J. Stone, *Choice*, Vol. 51 (4), December, 2013)

### From the Back Cover

This book represents an interdisciplinary approach to the relevant aspects of agricultural production related to the interactions between natural processes, human activities and the environment. It provides condensed and comprehensive knowledge on the functions of various agroecosystems at the field, landscape and global scale. Understanding and integrating complex ecological processes into field production, land management and food systems is essential in order to deal with the challenges of modern crop and livestock production. These are characterized by the need for food security for the growing human population on the one hand, and the necessity to combat the detrimental effects of food production on the environment on the other.

The book provides the scientific basis required by students and scientists involved in the theoretical and practical development of sustainable agroecosystems and contributes to a range of disciplines including Agriculture, Biology, Geography, Landscape Ecology, Organic Farming, Biological Control, and Global Change Ecology.

Specific chapters include: the beginnings and progress of agriculture; abiotic processes and species interactions in agroecosystems; ecology of agricultural soils, weeds, pests and diseases; management and control options; livestock production systems, agroecosystems of the different ecozones of the world; environmental problems including land degradation and effects of land use on biodiversity and ecological cycles; global aspects related to the future of human food production, global climate change and the increasing world population.

### About the Author

**Konrad Martin** is biologist and agroecologist at the University of Hohenheim, Germany.

His specific interests are animal-plant interactions and community ecology. He was involved in various international research projects in countries of Southeast Asia and conducted studies on biological pest control and food webs in agroecosystems, on insect diversity cultivated tropical landscapes, and on the effects of land use change on species interactions.

**Joachim Sauerborn** studied agricultural sciences at the universities Giessen and Hohenheim, Germany. He conducted studies on weed ecology and agroecology in tropical and subtropical regions and spent a research period at the International Center for Agricultural Research in the Dry Areas in Aleppo, Syria. As a professor for agroecology at the University of Hohenheim, his main research is on land resources management in

tropical regions. He has published several books and over 70 articles in refereed journals.

## **Users Review**

### **From reader reviews:**

#### **Gregory Howard:**

Book is to be different per grade. Book for children right up until adult are different content. As we know that book is very important for all of us. The book Agroecology ended up being making you to know about other understanding and of course you can take more information. It is rather advantages for you. The guide Agroecology is not only giving you far more new information but also to get your friend when you truly feel bored. You can spend your personal spend time to read your guide. Try to make relationship while using book Agroecology. You never experience lose out for everything if you read some books.

#### **John Stanley:**

In this 21st century, people become competitive in each way. By being competitive now, people have do something to make them survives, being in the middle of often the crowded place and notice through surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yes, by reading a book your ability to survive increase then having chance to stay than other is high. In your case who want to start reading the book, we give you this specific Agroecology book as beginning and daily reading publication. Why, because this book is greater than just a book.

#### **Douglas Anderson:**

Reading a e-book can be one of a lot of activity that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new info. When you read a e-book you will get new information since book is one of several ways to share the information or perhaps their idea. Second, studying a book will make you actually more imaginative. When you examining a book especially fiction book the author will bring one to imagine the story how the figures do it anything. Third, you can share your knowledge to other individuals. When you read this Agroecology, you can tells your family, friends and soon about yours reserve. Your knowledge can inspire average, make them reading a book.

#### **Michele Stoney:**

Do you have something that you want such as book? The publication lovers usually prefer to choose book like comic, brief story and the biggest one is novel. Now, why not striving Agroecology that give your fun preference will be satisfied by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world much better then how they react towards the world. It can't be said constantly that reading practice only for the geeky man but for all of you who wants to be success person. So , for all you who want to start looking at as your good habit, you may pick Agroecology become your current starter.
