Before Atlantis: 20 Million Years of Human and Pre-Human Cultures By Frank Joseph

A comprehensive exploration of Earth's ancient past, the evolution of humanity, the rise of civilization, and the effects of global catastrophes

- Explores biological evidence for the aquatic ape theory and 20-million-year-old evidence of pre-human cultures from which we are not descended
- Traces the genesis of modern human civilization to Indonesia and the Central Pacific 75,000 years ago after a near-extinction-level volcanic eruption
- Examines the profound similarities of megaliths around the world, including Nabta Playa and Gobekli Tepe, to reveal the transoceanic civilization that built them all

Exploring emerging and suppressed evidence from archaeology, anthropology, and biology, Frank Joseph challenges conventional theories of evolution, the age of humanity, the origins of civilization, and the purpose of megaliths around the world. He reveals 20-million-year-old quartzite tools discovered in the remains of extinct fauna in Argentina and other evidence of ancient pre-human cultures from which we are not descended. He traces the genesis of modern human civilization to Indonesia and the Central Pacific 75,000 years ago, launched by a catastrophic volcanic eruption that abruptly reduced humanity from two million to a few thousand individuals worldwide.

Further investigating the evolutionary branches of humanity, he explores the mounting biological evidence supporting the aquatic ape theory--that our ancestors spent one or more evolutionary phases in water--and shows how these aquatic phases of humanity fall neatly into place within his revised timeline of ancient history. Examining the profound similarities of megaliths around the world, including Nabta Playa, Gobekli Tepe, Stonehenge, New Hampshire's Mystery Hill, and the Japanese Oyu circles, the author explains how these precisely placed monuments of quartz were built specifically to produce altered states of consciousness, revealing the spiritual and technological sophistication of their Neolithic builders--a transoceanic civilization fractured by the cataclysmic

effects of comets.

Tying in his extensive research into Atlantis and Lemuria, Joseph provides a 20-million-year timeline of the rise and fall of ancient civilizations, both human and pre-human, the evolutionary stages of humanity, and the catastrophes and resulting climate changes that triggered them all--events that our relatively young civilization may soon experience.

Editorial Review

Users Review

From reader reviews:

Harriet White:

Nowadays reading books are more than want or need but also turn into a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge your information inside the book this improve your knowledge and information. The details you get based on what kind of book you read, if you want get more knowledge just go with knowledge books but if you want really feel happy read one using theme for entertaining such as comic or novel. The particular Before Atlantis: 20 Million Years of Human and Pre-Human Cultures is kind of book which is giving the reader erratic experience.

Robert Robertson:

Before Atlantis: 20 Million Years of Human and Pre-Human Cultures can be one of your starter books that are good idea. Many of us recommend that straight away because this book has good vocabulary that can increase your knowledge in language, easy to understand, bit entertaining however delivering the information. The writer giving his/her effort that will put every word into satisfaction arrangement in writing Before Atlantis: 20 Million Years of Human and Pre-Human Cultures however doesn't forget the main level, giving the reader the hottest and also based confirm resource info that maybe you can be one of it. This great information can easily drawn you into completely new stage of crucial pondering.

Susan Martinez:

Is it a person who having spare time subsequently spend it whole day by watching television programs or just lying down on the bed? Do you need something totally new? This Before Atlantis: 20 Million Years of Human and Pre-Human Cultures can be the answer, oh how comes? A book you know. You are and so out of date, spending your time by reading in this completely new era is common not a geek activity. So what these textbooks have than the others?

Robert Bowser:

As a pupil exactly feel bored to reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just little students that has reading's heart and soul or real their hobby. They just do what the teacher want, like asked to the library. They go to there but nothing reading really. Any students feel that examining is not important, boring and also can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Before Atlantis: 20

Million Years of Human and Pre-Human Cultures can make you truly feel more interested to read.
