Cardiac Arrhythmias in Children and Young Adults with Congenital Heart Disease By Edward P. Walsh MD, J. Philip Saul MD, John K. Triedman MD

This volume reviews current pathophysiologic concepts and describes state-of-the-art techniques for management of cardiac arrhythmias in children and young adults with congenital heart disease. The book provides a thorough understanding of cardiac electrophysiology and detailed technical information on catheter ablation, pacemakers, and implantable defibrillators. Coverage includes a "how-to" chapter on three-dimensional mapping techniques for localizing arrhythmias. A chapter by world-renowned experts examines current treatment options for postoperative atrial tachycardia. The book also includes a review of the anatomy of the cardiac conduction system and a discussion of new findings in molecular genetics that relate to hereditary arrhythmias.
