**Gods of Eden: Egypt's Lost Legacy and the Genesis of Civilization** By Andrew Collins

A groundbreaking historical documentation of the secret history of pre-Pharonic Egypt and the race of angels that built it.

- By the author of *From the Ashes of Angels* and *Gateway to Atlantis* (more than 30,000 copies sold in the United Kingdom).
- Unlocks the secrets of how the Great Pyramids and the Sphinx were built.
- Explains the traces left by the race of Elder gods that founded ancient Egypt through ancient texts of the Hall of Records.
- Proves the foundations of ancient astronomy 10,000 years ago.

Hidden deep below Egypt's Giza plateau is perhaps the key to unlocking the mysteries of the Great Pyramid, one of the seven wonders of the world. Built using a technology unequaled even today, the ancient Egyptians claimed they inherited their advanced culture from a race of Elder gods who lived during a previous age known as *Zep Tepi*, the First Time.

In his earlier companion book *From the Ashes of Angels*, renowned historical writer Andrew Collins provided historical and scientific evidence showing how these Elder gods, who were the flesh and blood members of a race of fallen angels, founded ancient Egypt. Now, in *Gods of Eden*, he describes the remarkable achievements of their culture.

Assembling clues from archaeology, mythology, and religion, Collins shows us how this great society mastered acoustic technology and employed the use of sound to raise heavy objects into the air and pierce holes through solid rock. It was with this technology that they were able to construct gigantic structures that have marveled adventurers and archaeologists worldwide. With findings based on more than 20 years of research and scholarship, Collins reveals the fascinating historical destiny of this culture of fallen angels and the imprints and legacies they left behind at the genesis of civilization.

### Editorial Review

#### Review

"Here is an author to watch. Here is someone who is really interested in the truth and will take us there at all costs. If science as a whole had a dozen more thinkers of this courage and tenacity then we would all be celebrating the millennium in the warmth of a new golden-age." (*Rand Flem-ath*, co-author of *The Atlantis Blueprint* and *When the Sky Fell*)

". . . a fascinating piece of research which does much to bring the biblical world of Eden back into the historical spotlight." (*David Rohl*, *Egyptologist*, author of *A Test of Time*)

Hidden deep below Egypt's Giza plateau is perhaps the key to unlocking the mysteries of the Great Pyramid. Built using a technology unequaled even today, the ancient Egyptians claimed they inherited their advanced culture from a race of giants who lived during a previous age known as Sep Tepi, the First Time.

In his earlier companion book *From the Ashes of Angels*, Andrew Collins provided sound historical evidence to show that this strange race, described in ancient mythology as Elder gods and fallen angels, founded pre-Pharonic Egypt. Now, in *Gods of Eden*, he describes their remarkable achievements.

Assembling clues from archaeology, mythology, and religion, Collins shows us how this prehistoric global society mastered acoustic technology and employed the use of sound to raise heavy objects into the air and pierce holes through solid rock. It was with this technology that they were able to construct pyramids and other gigantic structures everywhere from Egypt to Peru, Mexico to ancient Tibet. Collins explains the traces left by these Elder gods from ancient texts worldwide and demonstrates their role in the foundations of ancient astronomy over 10,000 years ago. With findings based on more than twenty years of research and scholarship, Collins reveals the fascinating historical destiny of this fallen race and defines the imprints and legacies they left behind at the genesis of civilization.

ANDREW COLLINS has been investigating the idea of an advanced civilization existing before recorded history since 1979.
