## Human Factors Methods for Improving Performance in the Process Industries By CCPS (Center for Chemical Process Safety)

*Human Factors Methods for Improving Performance in the Process Industries* provides guidance for managers and plant engineering staff on specific, practical techniques and tools for addressing forty different human factors issues impacting process safety. Human factors incidents can result in injury and death, damage to the environment, fines, and business losses due to ruined batches, off-spec products, unplanned shutdowns, and other adverse effects. Prevention of these incidents increases productivity and profits.

Complete with examples, case histories, techniques, and implementation methodologies, *Human Factors Methods for Improving Performance in the Process Industries* helps managers and engineering staff design and execute an efficient program. Organized for topical reference, the book includes:

- An overview on implementing a human factors program at the corporate level or the plant level, covering the business value, developing a program to meet specific needs, improving existing systems, roles and responsibilities, measures of performance, and more
- Summaries of forty different human factors relating to process safety, with a description of the tools, a practical example with graphics and visual aids, and additional resources
- Information on addressing the OSHA Process Safety Management (PSM) requirement for conducting human factors reviews in process hazard analyses (PHAs)
- A CD-ROM with a color version of the book

**Note:** CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

## **Editorial Review**

From the Back Cover

**The proper application of human factors is a valuable investment in overall process safety**

This book provides guidance for managers and plant engineering staff on specific, practical techniques and tools for addressing forty different human factors issues impacting process safety. Human factors incidents can result in injury and death, damage to the environment, fines, and business losses due to ruined batches, off-spec products, unplanned shutdowns, and other adverse effects. Prevention of these incidents increases productivity and profits.

Complete with examples, case histories, techniques, and implementation methodologies, *Human Factors Methods for Improving Performance in the Process Industries* helps managers and engineering staff design and execute an efficient program. Organized for topical reference, the book includes: ?

- An overview on implementing a human factors program at the corporate level or the plant level, covering the business value, developing a program to meet specific needs, improving existing systems, roles and responsibilities, measures of performance, and more
- Summaries of forty different human factors relating to process safety, with a description of the tools, a practical example with graphics and visual aids, and additional resources
- Information on addressing the OSHA Process Safety Management (PSM) requirement for conducting human factors reviews in process hazard analyses (PHAs)
- A CD-ROM with a color version of the book

### About the Author

Since 1985, the **Center for Chemical Process Safety (CCPS)** has been the world leader in providing information on process safety management and technology. CCPS, an industry technology alliance of the American Institute of Chemical Engineers (AIChE), has published over eighty books in its process safety guidelines and process safety concepts series. In this book, CCPS teams up with the AIChE Safety and Health Division. Members of the CCPS Human Factors Subcommittee contributed chapters or sections in their areas of expertise. For more information, visit [www.ccpsonline.org](http://www.ccpsonline.org).

## **Users Review**

### **From reader reviews:**

#### **Joyce Matchett:**

What do you about book? It is not important together with you? Or just adding material when you require something to explain what the ones you have problem? How about your spare time? Or are you busy person? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? Everybody has many questions above. They need to answer that question due to the fact just their can do that. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this specific Human Factors Methods for Improving Performance in the Process Industries to read.

**Patricia Welling:**

Often the book Human Factors Methods for Improving Performance in the Process Industries will bring you to definitely the new experience of reading the book. The author style to elucidate the idea is very unique. In the event you try to find new book to learn, this book very suited to you. The book Human Factors Methods for Improving Performance in the Process Industries is much recommended to you you just read. You can also get the e-book from official web site, so you can quicker to read the book.

**Joyce Lynch:**

The publication untitled Human Factors Methods for Improving Performance in the Process Industries is the reserve that recommended to you to study. You can see the quality of the e-book content that will be shown to a person. The language that publisher use to explained their ideas are easily to understand. The article author was did a lot of investigation when write the book, to ensure the information that they share to your account is absolutely accurate. You also could get the e-book of Human Factors Methods for Improving Performance in the Process Industries from the publisher to make you more enjoy free time.

**Samantha Green:**

That book can make you to feel relax. That book Human Factors Methods for Improving Performance in the Process Industries was vibrant and of course has pictures on the website. As we know that book Human Factors Methods for Improving Performance in the Process Industries has many kinds or style. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading that.
