### Editorial Review

#### Amazon.com Review

*The Colour of Magic* is Terry Pratchett's maiden voyage through the bizarre land of Discworld. His entertaining and witty series has grown to more than 20 books, and this is where it all starts--with the tourist Twoflower and his hapless wizard guide, Rincewind ("All wizards get like that ... it's the quicksilver fumes. Rots their brains. Mushrooms, too."). Pratchett spoofs fantasy clichés--and everything else he can think of--while marshalling a profusion of characters through a madcap adventure. *The Colour of Magic* is followed by *The Light Fantastic*. --Blaise Selby

#### Review

"Ingenious, brilliant, and hilarious."

#### From the Inside Flap

Somewhere on the frontier between thought and reality exists the Discworld, a parallel time and place which might sound and smell very much like our own, but which looks completely different. It plays by different rules. Certainly it refuses to succumb to the quaint notion that universes are ruled by pure logic and the harmony of numbers.

But just because the Disc is different doesn't mean that some things don't stay the same. Its very existence is about to be threatened by a strange new blight: the arrival of the first tourist, upon whose survival rests the peace and prosperity of the land. But if the person charged with maintaining that survival in the face of robbers, mercenaries and, well, Death, is a spectacularly inept wizard, a little logic might turn out to be a very good idea.
