Ancestors of American Presidents By Gary Boyd Roberts

This authoritative book by Gary Boyd Roberts, Senior Research Scholar Emeritus at NEHGS, comprises up-to-date information about ancestors of every American president from George Washington to Barack Obama. Taken as a whole, the ancestries of the presidents demonstrate the geographical and social range of successive political elites - more so now than ever, with the election of America's first biracial president. More than thirty years in the making, the book is a capsule distillation of American social history. It covers the full traceable ancestry of the 43 individual American presidents (Cleveland, the 22nd and 24th president, is only counted once), and covers seven generations for those born in the eighteenth century, eight generations for those born in the nineteenth century, nine generations for those born in the twentieth century, and ten generations for Bill Clinton, George W. Bush, and Barack Obama.
