Predicting the Weather: Victorians and the Science of Meteorology By Katharine Anderson

Victorian Britain, with its maritime economy and strong links between government and scientific enterprises, founded an office to collect meteorological statistics in 1854 in an effort to foster a modern science of the weather. But as the office turned to prediction rather than data collection, the fragile science became a public spectacle, with its forecasts open to daily scrutiny in the newspapers. And meteorology came to assume a pivotal role in debates about the responsibility of scientists and the authority of science.

Studying meteorology as a means to examine the historical identity of prediction, Katharine Anderson offers here an engrossing account of forecasting that analyzes scientific practice and ideas about evidence, the organization of science in public life, and the articulation of scientific values in Victorian culture. In *Predicting the Weather*, Anderson grapples with fundamental questions about the function, intelligibility, and boundaries of scientific work while exposing the public expectations that shaped the practice of science during this period.

A cogent analysis of the remarkable history of weather forecasting in Victorian Britain, *Predicting the Weather* will be essential reading for scholars interested in the public dimensions of science.

Editorial Review

Review

"Engaging and enlightening. . . . Anderson's portrait of Victorian meteorology is delicately and deftly drawn, enlivened by well-chosen examples and illustrations. As one might expect of a study of the British and their weather, it penetrates into the oddest crannies of the culture, from insurance companies to Hardy's novels."
(Lorraine Daston *London Review of Books* 2005-11-03)

"This is an excellent book, written in an accessible fashion with many interesting stories surrounding the trials and tribulations of pioneering scientists. These stories are also richly sourced, providing factual and historical significance. . . . Weather enthusiasts at all levels will benefit from reading this book.—Mace Bentley, *Weatherwise*
(Mace Bentley *Weatherwise*)

"By showing how much culture went into the making of Victorian meteorology, Anderson has made a major contribution to our understanding of how the Victorians themselves understood the cultural place of their science."

(Iwan Rhys Morus *Nuncius*)

"Anderson provides a fuller portrait of the period when meteorology became institutionalized than has previously been available. . . . An engaging and convincing portrait of the lively Victorian debates over the weather."

(Sarah Dry *Historical Studies in the Physical and Biological Sciences*)

"Anderson has written an innovative and impressively wide-ranging cultural history of studies of the British weather."

(Robert W. Smith *Victorian Studies*)

About the Author

Katharine Anderson is associate professor in the science and society program at York University.

Users Review

From reader reviews:

Paul Hill:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite e-book and reading a reserve. Beside you can solve your condition; you can add your knowledge by the reserve entitled Predicting the Weather: Victorians and the Science of Meteorology. Try to make the book Predicting the Weather: Victorians and the Science of Meteorology as your good friend. It means that it can for being your friend when you really feel alone and beside that course make you smarter than before. Yeah, it is very fortuned for you. The book makes you far more confidence because you can know anything by the book. So , let me make new experience along with knowledge with this book.

David Fulton:

As people who live in the actual modest era should be update about what going on or details even knowledge to make all of them keep up with the era which is always change and progress. Some of you maybe will certainly update themselves by reading books. It is a good choice for you personally but the problems coming to an individual is you don't know which you should start with. This Predicting the Weather: Victorians and the Science of Meteorology is our recommendation so you keep up with the world. Why, since this book serves what you want and wish in this era.

Nancy Brown:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book was rare? Why so many query for the book? But virtually any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but in addition novel and Predicting the Weather: Victorians and the Science of Meteorology or others sources were given knowledge for you. After you know how the truly amazing a book, you feel want to read more and more. Science publication was created for teacher or students especially. Those books are helping them to add their knowledge. In some other case, beside science book, any other book likes Predicting the Weather: Victorians and the Science of Meteorology to make your spare time far more colorful. Many types of book like this one.

Chester Brown:

Reserve is one of source of understanding. We can add our knowledge from it. Not only for students and also native or citizen have to have book to know the revise information of year to be able to year. As we know those publications have many advantages. Beside many of us add our knowledge, also can bring us to around the world. By book Predicting the Weather: Victorians and the Science of Meteorology we can get more advantage. Don't you to be creative people? For being creative person must want to read a book. Simply choose the best book that suitable with your aim. Don't always be doubt to change your life with this book Predicting the Weather: Victorians and the Science of Meteorology. You can more attractive than now.
