Telegeoinformatics: Location-based Computing and Services By Amin Hammad

This book explains the fundamentals and intricacies of telegeoinformatics. The book is divided into three parts: Theories and Technologies; Integrated Data and Technologies; and Applications. These sections are divided into smaller contributed chapters, each of which addresses a topic crucial to the understanding of telegeoinformatics. This volume covers the concepts and technologies related to GIS and geoprocessing, remote sensing, the GPS, and wireless systems. It also explores the main issues of integrated data and technologies in LBC, LBS, mediated reality, and mobile augmented reality systems. The final part discusses applications of telegeoinformatics in emergency response, mobile inspection data collection, and ITS.

Editorial Review

Review

This important and unique book will certainly further the understanding of and the application of telegeoinformatics in different environments such as urban planning, emergency response, real time tracking, wireless communication, and the exciting new research in augmented reality. A very readable book.

Summing Up: Recommended.

- CHOICE, Nov. 2004, Vol. 42, No. 3

This book covers nearly every aspect of location-based computing and services, and is the most comprehensive one of its kind produced hither-to...the book is well-organized and is detailed in its approach. With the rapid development of LBC and LBCS, the reviewer has no doubt that this book will be well-received...Telegeoinformatics has a reasonably good opportunity to scale great heights. This book can serve as a starting point for those interested in such a rapidly growing field.

- Geomatica, Vol. 59, No. 1, 2005

It constitutes a concise reference on several core topics for LBS, such as positioning systems, wireless communication, and augmented reality; it provides valuable insights into some of the applications that increasingly may depend on LBS; and it makes a substantial contribution to the continuing development of this fast-moving topic.

-Matt Duckham, Computers & Geosciences, 2005

Users Review

From reader reviews:

Richard Slawson:

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their sparetime with their family, or their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? May be reading a book is usually option to fill your free time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the reserve untitled Telegeoinformatics: Location-based Computing and Services can be good book to read. May be it may be best activity to you.

Ilene Cody:

Are you kind of occupied person, only have 10 or maybe 15 minute in your time to upgrading your mind talent or thinking skill possibly analytical thinking? Then you have problem with the book compared to can satisfy your short space of time to read it because pretty much everything time you only find publication that need more time to be study. Telegeoinformatics: Location-based Computing and Services can be your answer since it can be read by anyone who have those short free time problems.

Cheryl Fisher:

This Telegeoinformatics: Location-based Computing and Services is new way for you who has curiosity to look for some information given it relief your hunger info. Getting deeper you in it getting knowledge more you know otherwise you who still having little bit of digest in reading this Telegeoinformatics: Location-based Computing and Services can be the light food for yourself because the information inside that book is easy to get by means of anyone. These books acquire itself in the form which can be reachable by anyone, yep I mean in the e-book type. People who think that in e-book form make them feel sleepy even dizzy this e-book is the answer. So there isn't any in reading a e-book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the item! Just read this e-book kind for your better life and also knowledge.

Joshua Little:

Do you like reading a publication? Confuse to looking for your chosen book? Or your book was rare? Why so many query for the book? But any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but additionally novel and Telegeoinformatics: Location-based Computing and Services or maybe others sources were given knowledge for you. After you know how the good a book, you feel want to read more and more. Science reserve was created for teacher or students especially. Those guides are helping them to increase their knowledge. In other case, beside science publication, any other book likes Telegeoinformatics: Location-based Computing and Services to make your spare time a lot more colorful. Many types of book like this one.
