### Dazzling Division: Games and Activities That Make Math Easy and Fun By Lynette Long

Don't Just Learn Division . Master It! Brimming with fun and educational games and activities, the Magical Math series provides everything you need to know to become a master of mathematics! In each of these books, Lynette Long uses her own unique style to help you truly understand mathematical concepts as you play with everyday objects such as playing cards, dice, coins, paper, and pencil. Inside Dazzling Division, you'll learn the basics of division and then quickly begin to solve division problems. You'll find out what divisors, dividends, and quotients are and how to look at division as simply putting items into groups. Once you've grasped these basics, you'll practice your skills with such fun games and activities as Division Tic-Tac-Toe, Off to the Races, and Three-in-a-Row Bingo. Finally, you can move on to become truly dazzling at division by mastering the mysteries of remainders, prime numbers, and long division while playing Prime Mania and Shout It Out! So why wait? Jump right in and find out how easy it is to become a mathematics master!

### Editorial Review

From [Booklist](#)

Reviewed with Lynette Long's *Marvelous Multiplication*.

Gr. 2-5. These two large-format paperbacks offer explanations and activities for children who don't understand or haven't mastered multiplication and division. By taking different approaches to explain the same concepts, Long increases the probability that something will click in the student's mind. Some chapters, such as the one on multiplying by one, are excellent for building solid understanding. Others, such as the chapter on dividing by erasing zeroes, are disappointing in this regard. The cheerful ink drawings help make the books more inviting. Overall, these will be useful supplemental resources for students who need some help with the fundamental skills of multiplication and division. *Carolyn Phelan*
